2. Risk Analysis & Premium Pricing

Predicted Risk Class	Class 1 of 8
Risk Category	Low Risk
Recommended Annual Premium	\$10,000.00

3. AI Actuarial Analysis

Your recommended annual premium of ****\$10,000**** for your Health insurance policy is based on a comprehensive assessment of various factors, leading to your classification in ****Risk Class 1****.

Here's a breakdown of why this premium is recommended:

****Factors Contributing to your Favorable Risk Class (Risk Class 1):****

* ****Young Age:**** At 23 years old, you are in a very low-risk age group, which is a significant positive for health insurance.

* ****Good Health Indicators:**** Your healthy BMI (22.9), active exercise routine, and moderate alcohol consumption all reflect a generally healthy lifestyle.

* ****Clean History:**** You have no previous insurance claims and no adverse family medical history, which indicates a lower likelihood of future claims.

* ****Stable Occupation:**** Your occupation as a "worker" is generally considered a standard risk, not involving high hazards.

****Factors Influencing the Premium Amount within your Risk Class:****

* ****Smoking Status:**** Despite your otherwise healthy profile and young age, your status as a smoker significantly increases the perceived health risk. While your overall profile still places you in Risk Class 1 due to other strong positive factors, smoking consistently results in a higher premium for health insurance compared to non-smokers with similar profiles.

* ****Coverage Amount:**** Your requested coverage of \$300,000 is a substantial amount for a Health insurance policy, directly influencing the premium cost.

* ****Product Features (D2):**** The specific features and benefits offered by our 'D2' Health insurance product also contribute to the premium, as it likely provides comprehensive coverage and services.

In summary, your premium reflects a balance between your generally healthy profile and young age, weighed against the increased health risks associated with smoking and the comprehensive coverage you've selected.

4. Sign-off & Recommendation

Based on the predictive model output and AI underwriting guidelines, the premium recommendation is formally calculated at **\$10,000.00** per annum. The underwriting team should perform secondary manual verification if the risk class exceeds Class 5.
